Is Your Dog A Finicky Eater?

Try This New Product

By: Michelle Mantor

Like many dog owners, I own more than one dog and they are each unique. In my "pack", I have two chowhounds and one dog that is a finicky eater. As they say, "there's one in every crowd"!

But this lack of zeal for kibble can be very frustrating. For starters, the chowhounds grab my finicky eater's food if I don't feed them separately, which is a pain! So when I heard about Dog Lover's Choice Extra™ Topping, I was more than happy to test out the samples they sent me. It works! My little Yorkie Mix

(who only weighs 3 lbs, probably because she picks at her kibble) ate all of her food as soon as I sprinkled this magic mixture on top. This totally rocks because I can now feed all of my dogs at the same time without playing musical rooms with food bowls.

And, here's the even better part. This product is full of vitamins and essential oils for healthy skin and coat. Here are a few of the benefits:

- ALL NATURAL with Added Vitamins
- Omega 3 & Omega 6 promote Healthy Skin & Coat

- Vitamins A,D, E and Choline support overall Well-Being
- 100% Food Grade Ingredients
- Made in the USA from USA grown, manufactured and processed ingredients
- 100% Satisfaction Guarantee Promise

Bob Bridwell, Vice President of Yotta Pet Products, the makers and distributors of Dog Lover's Choice

notes, "We realize that a daily diet of kibble may not be inspiring to some dog's palates so developing a tasty topping full of health benefits seemed like the perfect way to supplement a dog's diet".

The product was just made available to consumers nationwide through a partnership with Kroger or you can purchase the product online at: dogloverschoice.com. One more great feature: the bottle design is easy, no mess with a check-valve and drip-resistant pouring lip.
